FULL STACK DEVELOPER

Hi there! I'm a full-stack developer with a passion for building scalable web applications and creating seamless user experiences from front to back. When I'm not coding, I'm a YouTuber dedicated to teaching others how to code. My channel covers everything from the basics of programming to advanced development techniques, helping people turn their coding dreams into reality. Whether you're just starting out or looking to level up your skills, I'm here to guide you on your coding journey!

PROFESSIONAL EXPERIENCE

Peppermint Cambodia
Software Engineer

Apr 2021 - Oct 2023

I've worked on a variety of projects, ranging from web development to mobile development, all as part of a remote position with a company based in France.

Accomplishments:

- Collaborated with a French team on an AI-driven project, ensuring seamless communication and integration across time zones.
- Led the storage team in managing a self-hosted S3 alternative, Minio, optimizing performance and reliability.
- Developed robust microservices using Python, enhancing the system's modularity and scalability.
- Contributed to the data pipeline by integrating Airbyte with S3 Minio, streamlining data ingestion and processing.
- Served as Team Lead, overseeing project execution
- Developed a mobile application for a real estate company using React Native, focusing on delivering a seamless user experience and cross-platform compatibility.

Daily Web Coding
Founder, Content Creator and Instructor

Oct 2018 - Present

Daily Web Coding focuses on exploring the latest web technologies, staying at the forefront of industry trends. We're passionate about helping you grow by sharing our in-depth knowledge and experience in web development

Accomplishments:

- 20k+ subscribers
- Educate and mentor aspiring developers, guiding them through coding challenges and problem-solving techniques to enhance their skills and confidence.
- Secured sponsorship from the tech company Supabase, enabling the creation of more valuable content and resources for the coding community.

OnlyDevKh
Founder

Dec 2023 - Present

An e-learning platform dedicated to teaching students how to code, based in Cambodia. The course content is delivered in the Khmer language, making coding education accessible to the local community.

Accomplishments:

- Over 150 students have registered and are actively learning on the platform, benefiting from tailored coding courses in their native language.
- Empowered hundreds of students to learn coding skills through a user-friendly platform, helping to foster a new generation of developers in Cambodia.

Budget Tracking
Founder

Jan 2023 - Jan 2023

It is a website to keep track of your financial expenses in a convenient and organized way. It typically allows you to input information about your purchases, income, and other financial transactions, and provides tools for analyzing and categorizing this information to help you better understand your spending habits.

Accomplishments:

- Over 100 users have registered and are utilizing the app to track their budgets and manage their finances
 - Implemented advanced analytics, providing users with detailed insights into their spending habits and helping them make informed financial decisions.
-

EDUCATION

Kirirom Institute of Technology (2018-2021)

Recipient of a 100% scholarship for the Software Engineering program, covering all tuition and fees.
